HW:

If you didn't watch Face the Nation last Sunday, July 20, you probably should have a tape of Schweiker laying out pretty exactly the phony pitch you've been talking about all along: Lee Harvey Oswald was pro-communist and pro-Castro, so NATURALLY he shot JFK as a pro-Castro reaction to all the CIA plots against Castro, implicitly with JFK and other Kennedy approval. Despite some apparent scepticism on the part of Herman, Schorr and Horrock, Schweiker carried it off pretty well. I think even if you did see it, you may need the tape, so here's a dub, preceded by KPFA's bit on the CIA-LSD program and an interesting bit about CIA infiltration of the media. If you don't need the tape, keep it for your own use in taping something else you do need.

Best,
